

Sales Bulletin # S150

December 14, 2005

1999-06 2" - 3½" Chevy/GMC Lift Systems

Superlift is now taking orders for these Lift Systems - Shipping late- December 2005

**2" & 3.5" lift systems for 1999-newer GM 1/2-ton 4WD pickups
2" & 2.75" lift systems for 1999-newer SUVs**

- Base system height adjusts from 2" to 3.5" while unique adjustable compression travel-stops allow you to tune vehicle ride and handling characteristics.
- Both upper and lower control arms are lowered to ensure that proper alignment remains constant throughout the suspension travel cycle.
- Lower control arm brackets are full-width crossmembers.
- Differential is lowered to optimize CV axle operating angles and service life.
- Dropped centerlink, with stabilizing link, corrects tie-rod geometry.
- Pickup rear lift options include 1.5", 2", 2.5" and 3.5" rear blocks, or 2" add-a-leaves. .75" tall coil spacer available for SUVs.
- Superlift Superide shocks (gas front, hydraulic rear) available. On models factory-equipped with Autoride electronic shocks or rear Air-Ride shocks, relocation brackets allow factory shocks to be retained.
- Factory wheels, or wheels with factory back spacing can be used.
- Options include: front multi-shock system (available Jan. 2006), stainless steel brush guard, TruSpeed speed signal recalibrator, Torque-Max traction bars, Rail Wraps stainless steel frame panels, eXtreme Ring rear diff cover protector.

Check it out!

Watch an install of this new suspension system on Superlift's Offroad Adventures TV on the Outdoor Channel. Episode will air Tuesday, January 17th at 6:00a.m., Thursday, January 19th at 1:30p.m. and Saturday, January 21st at 12:30p.m.
